Contract Entry

- Multi-branch support with transactional isolation.
- Quote, Contract, and Invoice document processing.
- Specify document formats by branch, contract type, or customer.
- User-defined contract types for efficient and effective data entry.
- · Accounting by branch and division with full multicurrency support.
- Use Dynamics GP tax engine or Avalara tax web service.
- · Automatic or manual renewal methods with user-defined rules.
- Document workflow with task confirmation and in-process holds.
- · Salesperson, territory, and commission support.
- · On-line contract profitability inquiry and analysis.
- · System and user-defined document status control.
- Full and partial accrual method for contract line receivables.
- User-defined price books by item, customer, and price level.
- Age-based price escalation tables by amount or percent.
- Contract or line cancellation with fixed or prorated billing.
- User-defined coverage types with CM and PM limits and exceptions.
- User-defined coverage pricing options by amount or percent.
- Option to suspend contract line coverage for user-defined period.
- Integrates with preventive maintenance for coverage and pricing.
- Window level notes, comments, online help, and sorted browser.

Billing & Revenue Schedules

- · Separate and independent billing and revenue schedules.
- · Fixed-fee, non-billable, service-based, usage-based billing methods.
- · Periodic, when-billed, or usage-based revenue recognition methods.
- Automatic or manual scheduling of billing and revenue frequency.
- Fixed or variable frequency for periodic billing and revenue methods.
- Compliant with ASC 606 'Revenue From Contracts With Customers'.
- User-defined start dates for billing and revenue schedules.
- · Coverage limits by service and resource, with rules and exceptions.
- Limit CM and PM coverage by weekday and time period.
- · Usage allowances with multi-tiered overage billing rates.
- Markdowns and trade discounts by amount or percentage.
- Sales commission calculation by salesperson and territory.
- · Online gross-to-net profitability inquiry and analysis.
- Auto-pay via credit card or eCheck (ACH) powered by *BluePay*.
- Schedule billing and revenue recognition in advance or arrears.

eService36

- Option to void suspended billing and revenue transactions.
- Option to specify level billing and/or revenue amounts.
- Window level online context-sensitive help

CM = Corrective Maintenance PM = Preventive Maintenance

Contract Line Coverage

- Support for standard and warranty type coverage.
- Warranty reimbursement via alternate bill-to address.
- Flexible service types for corrective and preventive maintenance.
- User-defined coverage schedules for contract line items.
- Coverage schedules for CM and PM service orders.
- Cumulative and transaction limits for CM and PM resource items.
 - Coverage exceptions for individual service and resource items.
 - · Option to combine services when generating PM service orders.
 - User-defined PM service planning horizon.
 - Fixed or variable PM schedules with user-defined intervals.
 - · Define PM frequency by time period or meter clicks.
 - Set up PM services as fixed-fee, time & materials, or non-billable.
 - · Specify stand-alone or contract-based PM schedules.
 - · Full support for seasonal PM schedules.
 - Online analysis of coverage limit vs. actual by quantity and currency.
 - Drill-down support for warranty, service type, and service schedule.
 - · Window level notes and online context-sensitive help.

Contract Line Usage

- Up to 3 separate usage meters per contract line item.
- Specify usage and overage as billable or non-billable.
- · Choose from 7 available billing frequencies (weekly thru annual).
- Support for both contract and periodic usage allowance.
- · Prorate periodic allowance for partial period contract lines.
- Separate allowances, usage, and overage for each meter.
- Include or exclude usage billing from commission calculations.
- · Option to cancel coverage when the contract allowance is depleted.
- 5 overage levels with user-defined quantity, rate, and billing method.
- Overage rate types include single rate, tiered rate, and fixed amount.
- User-specified markdown percent or amount for each meter.
- Enter usage or meter reading by date, technician and customer.
- Enter initial and replacement reading to start usage tracking.
- · Track daily, monthly and annual average usage.
- · Ability to edit historical readings to correct previous errors.
- · Add user notes and/or technician comments to each meter reading.
- View billing cycle status, overage, rate, gross, markdown, and net.
- · View cumulative billing totals by individual meter.
- Drill-down support for SOP invoice number and meter reading details.
- Window level online context-sensitive help.

Contract Billing

- : Multi-branch support with accounting by division and/or branch.
- Automatic batch numbering from system date and time.
- Post to or through Dynamics GP sales order processing module.
- Filter invoice selection using a robust array of restriction options.
- · Display all, included, or excluded invoices.
- Print comprehensive edit listing to ensure accurate posting.
- Multicurrency support with originating and/or functional amounts.
- Sort scrolling window by document number or customer ID.
- Option to include or exclude zero invoices and/or zero usage.
- Ability to print a different invoice format for each customer.
- Print and/or send invoice document via email as a PDF file.

PureLogi

- · Reprint previously printed invoices.
- Print to include dual currency taxes in detail or summary.
- Customize document formats using Microsoft Modifier.
- Identify and view on-hold invoices not eligible for billing.
- · Window level notes, online help, and sorted browser.

CM = Corrective Maintenance PM = Preventive Maintenance
